

# Release Notes

Release Date: 12/1/2022

## ADMIN

- FEATURES
  - Added the assignment of ELD providers to the driver profiles.
  - Improved page styling for overall design consistency.

## RELAY

- FEATURES
  - Improved how time is displayed and processed without adjusting for time zones using the values received from the driver.
- BUG FIXES
  - Fixed an issue where messages were not being sent to providers.
  - Resolved a problem with the “send message” hover text kept appearing in a modal.

## TORQUE

- FEATURES
  - Added mapping between reference numbers in forms for the Eleos provider to stop reference numbers in the TMS.
  - Added support for a driver’s available HOS for the Truckmate provider.
  - Added support for passing commodity types to the Eleos provider.
- BUG FIXES
  - Fixed an error processing the duty status for a trailer with a null value for the Solar provider.
  - Resolved an issue where secondary events were being deleted for a TMS integration.
  - Resolved an issue where the stops for the Eleos provider were not correctly updating.
