

Release Notes

Release Date: 1/10/2023

IDENTITY

- FEATURES
 - Improved page styling for overall design consistency.

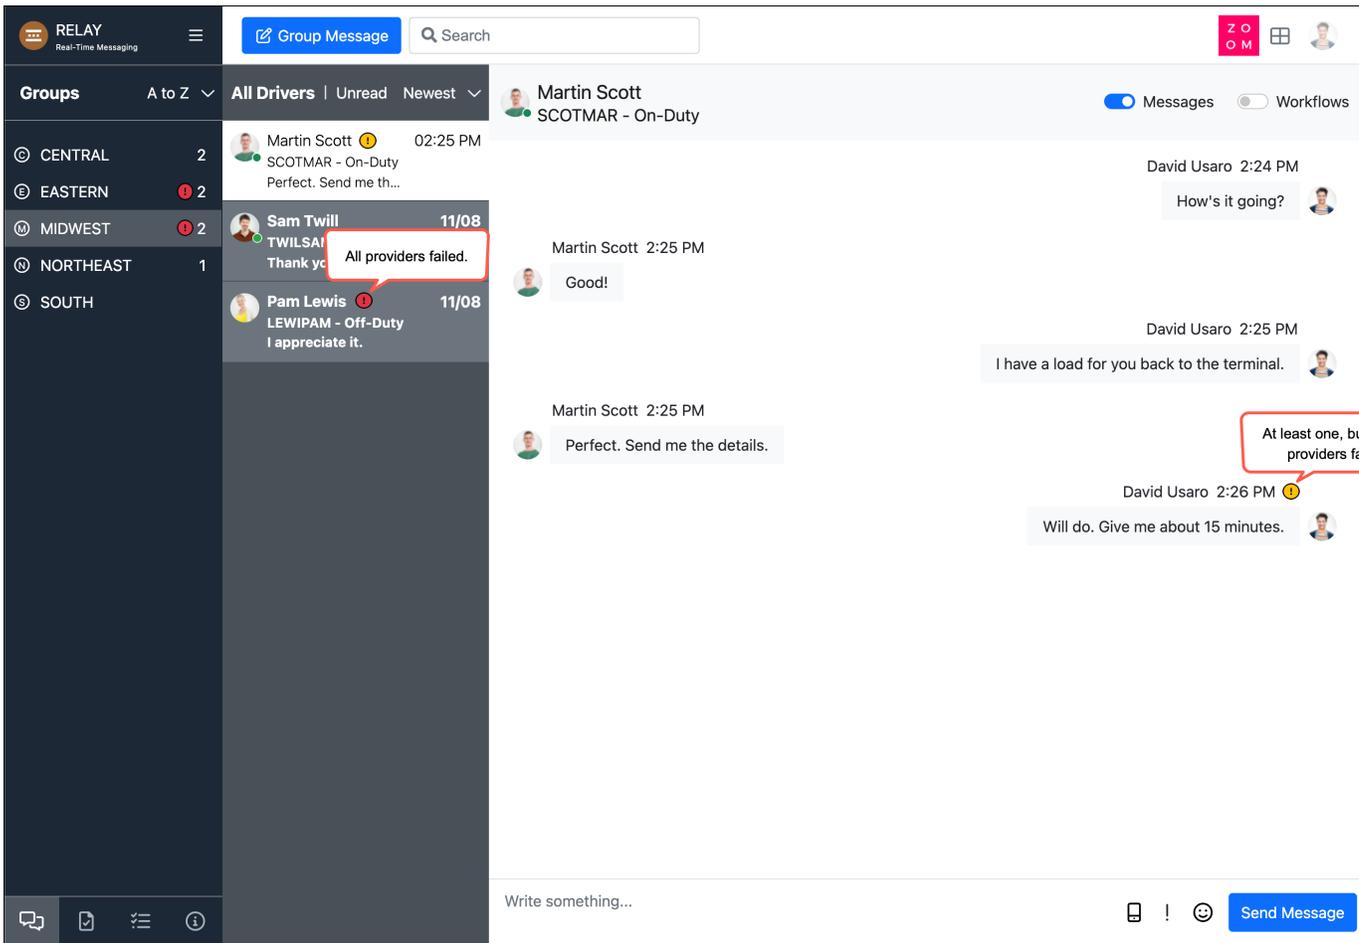

RELAY

- FEATURES
 - Improved page styling for overall design consistency.
 - Improved the visual indicators for messages failing for some, or all, providers. See image, “RELAY Message Indicators.”
 - Updated the API to allow for messages to be sent to a specific TORQUE provider.
- BUG FIXES
 - Fixed a bug with the search results not taking a user to the correct form or message.
 - Resolved an issue where documents with long titles were adding lines to the listing in the Documents column.

TORQUE

- FEATURES
 - Added integration for the sending of load assignments and messages using TMWS MobileCom.
 - Added driver reference number submission for the Truckmate integration.
 - Implemented SFTP staging for pipelines.
 - Updated the password rules for new drivers for the Geotab integration.
- BUG FIXES
 - Fixed a bug with the TMW API not sending a load status update information for the last stop.
 - Resolved an issue with the Eleos integration profile taking too long to open.

RELAY Message Indicators

The screenshot displays the RELAY messaging application interface. On the left, a sidebar lists groups: CENTRAL (2), EASTERN (2), MIDWEST (2), NORTHEAST (1), and SOUTH. The main chat area shows a group chat titled "All Drivers | Unread Newest" with participants Martin Scott (SCOTMAR - On-Duty), Sam Twill (TWILSAI), and Pam Lewis (LEWIPAM - Off-Duty). The chat history includes messages from Martin Scott and David Usaro. Two red callout boxes highlight error messages: "All providers failed." and "At least one, but not all, providers failed." The interface also features a search bar, a "Group Message" button, and a "Send Message" button at the bottom.
