Motorcity Systems

Release Notes

Release Date: 2/7/2023

ADMIN

- BUG FIXES
  - Resolved a caching issue that would occur upon a restart of the API.

IDENTITY

- FEATURES
  - Added support for automatically creating a default department when a new tenant is added.
  - Improved page styling for overall design consistency.

RELAY

- FEATURES
  - Added an indicator of a communications failure for a provider to the Message Status box. See image, "Message Status Box Communications Failure."
  - Added an indicator to messages received by the driver that was sent as a group message. See image, "Sent as a Group Message."
  - Added support for associating a default department with outbound messages.
  - Added workflow error count to the driver group. See image, "Error Count on a Driver Group."
- BUG FIXES
  - Fixed an issue where a document's review status didn't immediately get updated.
  - Resolved a bug where users with multiple department affiliations could not see a driver's messages until one was sent under the primary department that differed from the tenant's default department.
  - Resolved a problem with the Message Status box displaying extraneous headings.

TORQUE

- FEATURES
  - Added messaging to the Truckmate integration.
  - Mapped additional hours of service rulesets for the Geotab integration.
- BUG FIXES
  - Fixed a bug where syncing messages from the TMS caused workflows to process slower.
  - Fixed a problem in the Providers table where enabled providers were shown as disabled.
  - Resolved an issue with some providers having trouble connecting to the event hub.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
