

Release Notes

Release Date: 2/21/2023

ADMIN

- BUG FIXES
 - Resolved an issue where adding a provider to a driver resulted in two identical providers being assigned.

IDENTITY

- FEATURES
 - Improved page styling for overall design consistency.

RELAY

- FEATURES
 - Updated the TORQUE provider to include the provider name and type on the Driver Card. See image, “Driver Card.”

ROLLER Desktop

- FEATURES
 - Configured visibility settings and added prepopulated values for text and numeric field types for document types. See image, “Field Settings.”
 - Set a priority level for messages to be read to drivers using text-to-speech. See image, “Text-to-Speech Priority Level.”
 - Updated the navigation and Save button for document types.
- BUG FIXES
 - Resolved an issue with sorting on the delivery method for document types.

TORQUE

- FEATURES
 - Added functionality to send a text message of a load offer to a driver when a trip is dispatched for the Truckmate integration.
 - Added ROLLER as a TORQUE provider.
 - Added the ability for contacts in Eleos to be used for routing text messages to email addresses.
 - Made an accommodation for tractor-based carriers sending load assignments to drivers using MobileCom menu.
- BUG FIXES
 - Added a stop field to the workflow for a customer.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- Fixed a bug with the TMS sending a response of 204 instead of 200.
- Fixed a problem with the TORQUE client repeatedly sending load assignments and messages when using the MobileCom menu.
- Resolved an issue with check calls not having the correct date and time in the TMS for the Motive integration.

WIRE

- **FEATURES**
 - Updated the EDI code to use the secondary field if the primary field is null.
