

# Release Notes

Release Date: 3/7/2023

## RELAY

- FEATURES
  - Added filtering for documents in the documents panel. See image, “Document Filters.”
  - Moved document details to the right side of the window and set them to show on open. See image, “Document Details.”
  - Updated the document controls to float on top of the document. See image, “Document Controls.”
- BUG FIXES
  - Fixed an issue with the group message map posting an error when too many drivers were selected.

## TORQUE

- FEATURES
  - Added controls for the flow of telematics data to the TORQUE API.
  - Added driver status information for carriers unable to use the embedded integration with the Eleos integration.
  - Added email notifications to alert distribution groups when a driver sends a message.
  - Added the ability for pending, or PND, orders to be saved in the TMS.
  - Added the ability to disable shift processing for TMW users not using that feature to the TORQUE Client.
  - Added the request for fuel information at the start of a trip for the Truckmate integration.
