Release Notes

Release Date: 3/21/2023

ADMIN

- FEATURES
  - Improved page styling for overall design consistency.

RELAY

- FEATURES
  - Added sorting for documents. See image, "Document Sorting."
  - Added the ability to edit some document details. See image, "Edit Document Details."
  - Improved document filtering to include all fields, not just those matching the data set.
  - Made an update to document details to display the labels for fields instead of the IDs for the ROLLER integration.
- BUG FIXES
  - Fixed a problem with RELAY locking up when a group message was sent to a large number of drivers.

ROLLER Desktop

- FEATURES
  - Added administrative controls to manage the visibility of features in ROLLER Mobile.

TORQUE

- FEATURES
  - Added an adjustment setting for customers who do not wish for the cascading of date and time to be applied to estimated arrival and departure times for the TMW integration.
  - Added a time limit for filtering excessive amounts of telematics data, such as hours of service, coming from the Geotab integration.
  - Added functionality to update the ETA data submitted from workflow forms for TMW users.
  - Added the creation of contacts for the Eleos integration when departments are created in IDENTITY.
  - Added the ability to control the routing of telematics data for all integrations in TORQUE.
  - Added functionality to ask a driver additional questions if there was detention at a stop for the Eleos integration.
  - Embedded a link to the Motive app in the Eleos app.
  - Increased the transparency of load information being sent with the Eleos integration.
  - Removed the auto-creation of tasks in RELAY from the Drivewyze integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
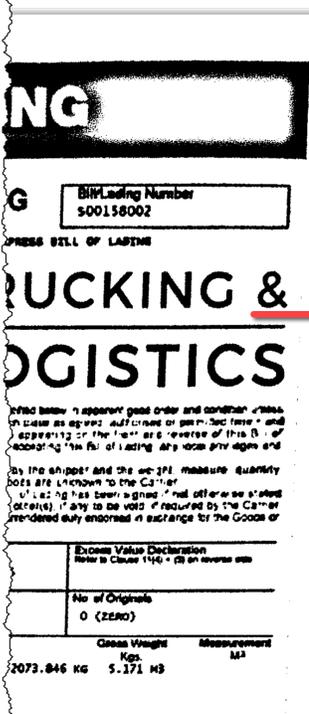

- BUG FIXES
    - Fixed a bug where planned loads that the driver didn't need to see were not being removed from the load list in Eleos.
    - Resolved an issue for the integration with TMW where messages could not be delivered because the driver didn't exist in RELAY.
