

Release Notes

Release Date: 4/4/2023

GAUGE

- BUG FIXES
 - Resolved an issue where new GAUGE workspaces were enabled for all tenants instead of being disabled.

RELAY

- FEATURES
 - Added the enforcement of field formatting to the editable document details.
 - Added visibility for open, approved, and rejected statuses for documents. See image, “Document Statuses.”
- BUG FIXES
 - Fixed a problem with long messages and forms not breaking across the message pane making the Send button not visible.

TORQUE

- FEATURES
 - Updated an authentication token to accommodate legacy application configurations for the Eleos integration.
- BUG FIXES
 - Fixed a problem with how daylight savings time is handled for customers using TMW.
 - Fixed a problem with split trips for customers using TMW.
 - Resolved an issue with the geofence auto-arrival for the Motive integration.

WIRE

- FEATURES
 - Added the trading partner name to the codes in the Sender and Receiver columns. See image, “Trading Partner Names.”
