Release Notes

Release Date: 5/2/2023

ADMIN

- FEATURES
  - Added filtering for drivers not assigned to a provider. See image, "Filter Drivers Not Assigned to a Provider."
- BUG FIXES
  - Fixed a problem with the search not allowing spaces in search criteria.
  - Resolved an issue preventing multiple changes from being made to a driver's profile at once.

IDENTITY

- FEATURES
  - Removed the Tasks feature.

RELAY

- FEATURES
  - Removed the Tasks feature.
- BUG FIXES
  - Addressed a problem with users receiving an error that they were not assigned to a department when they were.
  - Fixed a problem where multiple events happened in succession and some notifications weren't received.
  - Removed an extra arrow that appeared in the documents panel for users without access to messaging.
  - Resolved an issue with users being unable to use the search after a deployment.

ROLLER Desktop

- FEATURES
  - Added fields for inputting the physical dimensions of scanned documents. See image, "Dimensions for Scanned Documents."
  - Added the configuration of prepopulated values for date and time fields. See image, "Configuration of Prepopulated Values for Date and Time Fields."
  - Added the configuration of ROLLER Mobile menu items. See image, "Configuration of ROLLER Mobile Menu Items."
- BUG FIXES
  - Fixed a problem that didn't allow multiple instances of documents with the same name.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

TORQUE

- FEATURES
  - Added an API-to-API sync of driver and power unit data for the McLeod integration.
  - Added a setting to disable deadhead updates for the MobileComm integration.
  - Added a sync of driver and power unit data between ADMIN and the ORBCOMM integration.
  - Added support for additional trailer handling scenarios.
  - Improved event logging for the Truckmate integration.
  - Updated the Geotab user interface for overall design consistency. See image, "Geotab Interface."
- BUG FIXES
  - Resolved an issue where empty miles were not being sent for the MobileComm integration.
  - Updated the API for the Eleos integration to include contact information.
  - Updated the connection settings for the Twilio integration to not require a value for the message service SID.
