

# Release Notes

Release Date: 05/11/2021

## Admin

- Added a column and filtering for Business Unit to the Drivers Grid.
- Added a dropdown menu for Business Unit to the Driver Profile.

## Identity

- When creating a new task, by default, the user composing the task is assigned to that task.

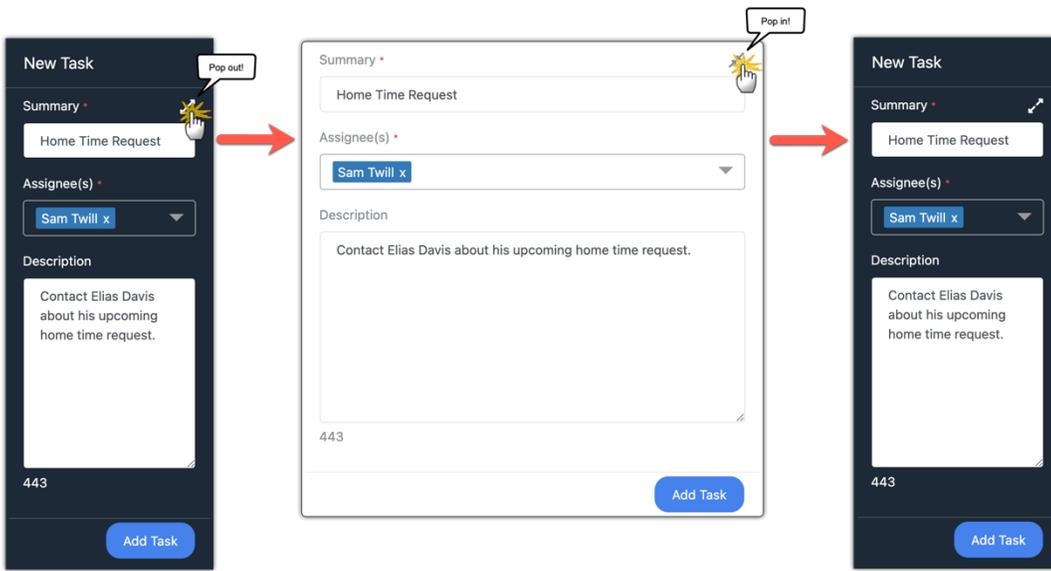

## Relay

- When creating a new task, the user may “pop” the task settings out of the column into a larger modal. Similarly the icon changes and the modal may be “popped” back into the column. See image, “Task Modal Pop-Out.”
- When creating a new task, by default, the user composing the task is assigned to that task.

## Torque

- Added an email address field specific to each document type in the Eleos Provider Configuration. See image, “Eleos Document Type Email Address.”
- Updated the user interface of the Eleos Provider Configuration with tabs. See image, “Eleos Configuration Tabs.”

## Task Modal Pop-Out

## Eleos Configuration Tabs

## Eleos Document Type Email Address
