

# Release Notes

Release Date: 7/11/2023

## ADMIN

- FEATURES
  - Improved page styling for overall design consistency.

## IDENTITY

- FEATURES
  - Improved page styling for overall design consistency.

## RELAY

- FEATURES
  - Added the export of historical messages and workflows. See image, “Export Messages and Workflows.”
  - Updated the priority coloring for outbound messages and form errors to ensure consistency.

## ROLLER

- FEATURES
  - Added the ability to upload multiple images for documents configured as TIFF files.

## ROLLER Desktop

- FEATURES
  - Added the field ID after the individual field name when creating or managing a document.
  - Configured the visibility settings for numeric fields in documents.

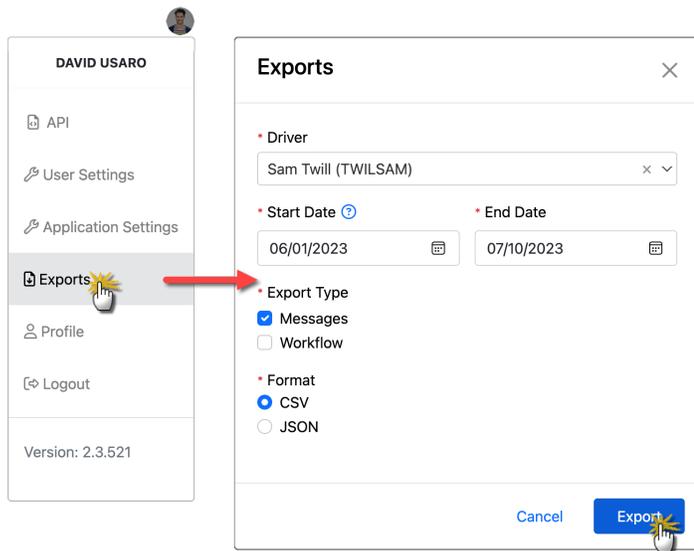

## TORQUE

- FEATURES
  - Added a setting to enable or disable sending SMS messages from TMW to MobileComm devices.
  - Created a trigger to send a load assignment with an updated fuel solution to the driver when a fuel level is entered at the start of the trip for the TMW integration.
  - Improved the handling of freight counts and weights entered by the driver as the data progresses between systems.
  - Improved the logic for updating reference numbers entered by the driver into order headers for the TMW integration.
  - Made trailer numbers case-insensitive between mobile apps and TMW.
