Release Notes

Release Date: 8/8/2023

ADMIN

- FEATURES
    - Improved page styling for overall design consistency.

RELAY

- FEATURES
    - Added automatic acceptance of an unreviewed document at 44 days (time-to-live, or TTL, is 45 days).
    - Added support for images sent by drivers via Twilio. See image, "Images in RELAY."
- BUG FIXES
    - Addressed a problem with inactive drivers appearing in a search that should only include active drivers.
    - Fixed an issue that would sometimes result in a missing HOS login status indicator on driver avatars.
    - Resolved an issue where documents past their TTL date were listed, but not viewable.

ROLLER

- FEATURES
    - Added support for notification counts badges in Android.
    - Added support for trailer number validation when submitting a document.
    - Added max page count validation when submitting a document.
    - Changed the name of the "Log out" button to "Sign out" for design consistency.
    - Improved the appearance of errors for date and time fields.
    - Improved the wording for permissions modals.

ROLLER Desktop

- BUG FIXES
    - Fixed a problem where the min and max validators remained in the settings when the field type was changed from numeric to text.
    - Resolved an issue where prepopulated fields did not display correctly after values were edited.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

TORQUE

- FEATURES
  - Added sending of fuel solutions and load assignments to both drivers on a team.
- BUG FIXES
  - Fixed a bug where load extraction durations increased over time.
  - Implemented fixes to prevent load notifications from being sent for both brokered and planned loads.

WIRE

- FEATURES
  - Added SFTP push option to document delivery.
