

# Release Notes

Release Date: 8/22/2023

## ADMIN

- FEATURES
  - Improved page styling for overall design consistency.

## RELAY

- FEATURES
  - Improved the appearance of the print status bar.

## ROLLER

- FEATURES
  - General maintenance and performance improvements.

## ROLLER Desktop

- BUG FIXES
  - Addressed a problem showing the driver preview when toggling between the “Date and Time” and “Date Only” options.
  - Resolved an issue where a default value for a field was removed if the field was edited before the document was saved.

## TORQUE

- FEATURES
  - Added handling for empty moves for the TMW integration.
  - Completed the master data sync and incorporated workflow events for the McLeod SMCS integration.
  - Removed the functionality to download a copy of the current TORQUE client from the sidebar.
  - Set the default Eleos version to 1.50 or higher.
- BUG FIXES
  - Added measures to correctly identify the HLT and DLT’s as part of an order for split trips for the TMW integration.
  - Fixed a bug with the load extract slowing over time.
  - Fixed an issue with TORQUE client erroring on the export of tractor information to ADMIN.

## WIRE

- BUG FIXES
  - Fixed a bug with the blob retrieval for the outbound SFTP.
