

# Release Notes

Release Date: 9/5/2023

## ADMIN

- BUG FIXES
  - Resolved an issue with inconsistent sorting of data in grids.

## RELAY

- FEATURES
  - Added the ability to zoom in and out of images. See image, “Zoom In and Out of Images.”
- BUG FIXES
  - Resolved an issue where portions of some images in the document review were being cut off.

## ROLLER

- FEATURES
  - Added a signature capture component for documents. See image, “Signature Capture.”
  - Added support for showing and hiding fields based on the values of other fields.
  - Added the ability to upload images in Messages. See image, “Images in Messages.”
- BUG FIXES
  - Resolved an issue where the Send button didn’t display until a character was typed in the message field if a message was immediately sent after another (iOS only).

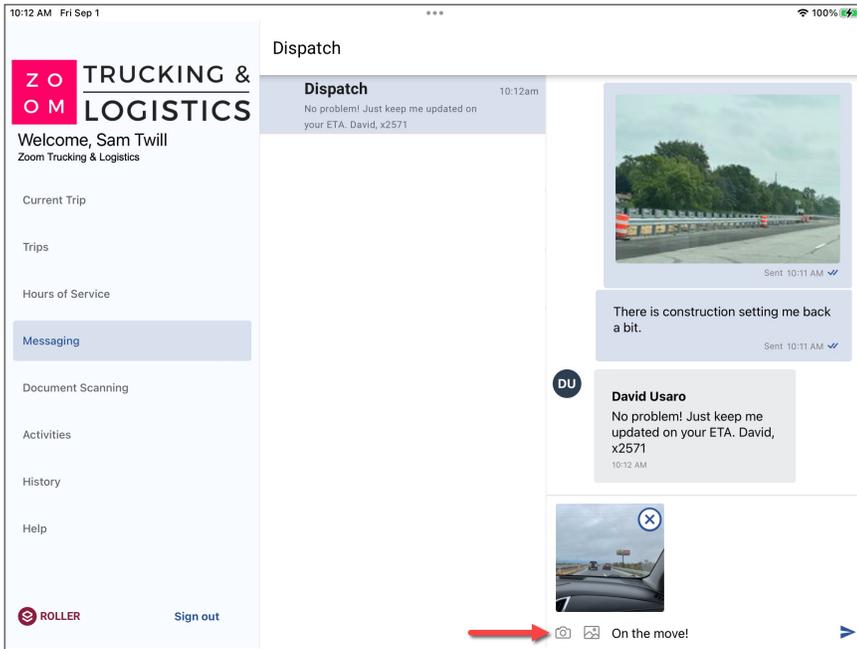

## TORQUE

- FEATURES
  - Added an audible alert for a driver receiving a load assignment message.
  - Added health checks, monitoring, and the validation of endpoints for the McLeod integration.
  - Added workflow support for the McLeod integration.
  - Improved the error message sent when a stop is updated, but already noted as arrived or departed in the TMS.
  - Improved the handling of forms by adding department routing and sending to multiple email addresses.
  - Updated the Eleos integration to allow a driver to be configured for more than one Eleos integration.
- BUG FIXES
  - Fixed an issue with TruckMate erroring when messages were sent without a contact.
  - Resolved an issue with tractor data automatically exporting to ADMIN.
  - Updated the prefix and changed to use leg number for empty moves for the TMW provider.
