Release Notes

Release Date: 10/3/2023

ADMIN

- FEATURES
    - Added history tracking to settings to help with debugging.

RELAY

- FEATURES
    - Added badges to the navigation to show when new messages and documents are received. See image, "Badges for New Messages and Documents."
    - Added the open document count to departments for document review. See image, "Counts of Open Documents."
    - Changed the font size of the text in the avatar bubbles to accommodate wide letters.
    - Improved the message previews and system notifications when images are received from drivers. See image, "Message Previews and Notifications for Received Images."
- BUG FIXES
    - Fixed a problem filtering modified document types.
    - Resolved an issue with the filename pattern for a document pulling data from the original document instead of the modified document.

ROLLER

- FEATURES
    - Added support for full image preview in Messaging. See image, "Full Image Preview."
    - Added longitude and latitude data communication with forms and messages to help update a driver's current location.
    - Improved the display of helper text when documents or forms are opened.
- BUG FIXES
    - Improved application performance when typing long messages.
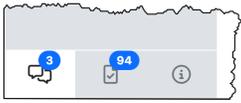

TORQUE

- FEATURES
    - Added the display of Workflow Tasks from Platform Science drivers to RELAY.
    - Improved the performance of the XRS integration.
    - Integrated the Eleos and ROLLER workflows with McLeod.
   - Integrated the ROLLER workflow with Truckmate.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- BUG FIXES
    - Removed leading and ending spaces on trailer numbers for trailer validation.
    - Resolved an issue with TMWSuite adding unnecessary deadheads ahead of the second leg of a split.
