Motorcity Systems

Release Notes

Release Date: 10/17/2023

GAUGE

- BUG FIXES
  - Fixed a bug with the data sync and consistently setting the partition key.

RELAY

- BUG FIXES
  - Fixed a bug with the document count on the department ignoring filters.
  - Resolved an issue with the open document counts reflecting the entire department instead of the user's group visibility.

ROLLER

- FEATURES
  - Improved scrolling on forms and messages.
  - Implemented a loader for Messaging.
- BUG FIXES
  - Resolved an issue with the keyboard not closing when a signature modal opened.

ROLLER Desktop

- FEATURES
  - Added grayscale support for documents. See image, "Grayscale Mode for Documents."
  - Expanded on the validation for numeric or text fields to include trailer validation and additional options for invalid value submissions. See image, "Trailer Validation and Additional Options."

TORQUE

- FEATURES
  - Added a location sync with the Geotab integration.
  - Implemented the ingestion and mapping of the HOS rules for the ORBCOMM integration.
- BUG FIXES
  - Addressed an issue with a fuel solution not being called when a trip's status was updated for the Truckmate integration.

Commented [JY1]: @Chase Hoffman should we announce this now or maybe after the next iteration with apps?

Commented [JP2R1]: This was one of the ones I wasn't sure of. :)

Commented [CH3R1]: @Jeff Yin @Jennifer Paradise - Yeah let's hold off until the next release please.
