

Release Notes

Release Date: 11/1/2023

IDENTITY

- FEATURES
 - Added contact information to the tenant's details. See image, "Tenant Contact Information."

ROLLER

- FEATURES
 - Added a confirmation modal prior to leaving a screen when changes were made, but not saved.
 - Added linking to mobile apps and websites to the Links screen. See image, "Links Screen."
 - Added validation settings for unique situations, such as drivers who are offline, to document fields.

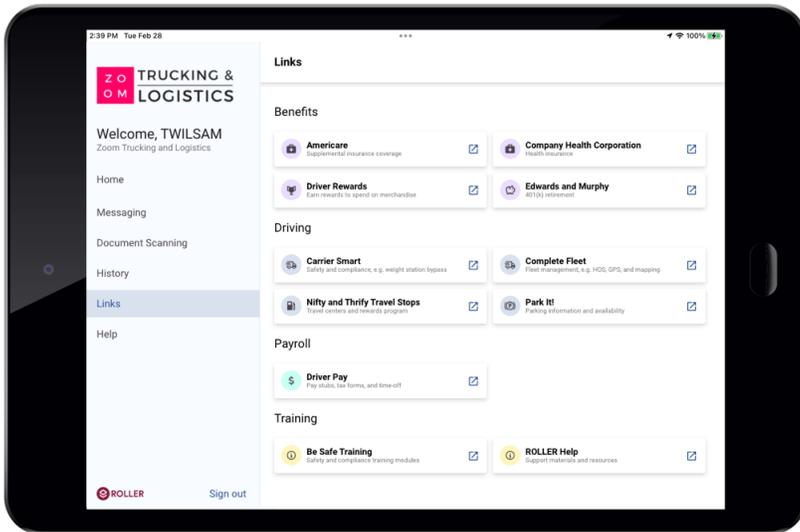

TORQUE

- BUG FIXES
 - Fixed a bug with the driver not advancing from pickup to departure after the auto-arrive on the geofence break.
 - Resolved an issue with trailer numbers not updating for the ROLLER integration.
 - Updated the logging of missing workflow JSON files from a warning to an error.

WIRE

- FEATURES
 - Added functionality to translate 214's from the carrier's TMS and update load statuses and pings to the FourKites API.
