

# Release Notes

Release Date: 11/14/2023

## IDENTITY

- BUG FIXES
  - Resolved an issue creating new user accounts and using the “Forgot Password” tool.

## RELAY

- FEATURES
  - Added settings for configuring how drivers are grouped based on departments and other organizational entities. See image, “Groups Organization.”
- BUG FIXES
  - Addressed an issue when a “forbidden” error was received by a user when attempting to review documents.
  - Fixed a bug where new documents appeared twice when scrolling through the documents list.
  - Resolved a problem with documents missing values after a refresh of the browser.

## ROLLER

- FEATURES
  - Added a screen loader when opening full-sized images in Messages.
  - Added password visibility if there is an error authenticating on sign-in. See image, “Password Visibility.”

## ROLLER Desktop

- FEATURES
  - Added functionality to use text fields to conditionally show or hide other fields. See image, “Text Fields as Conditions.”

## TORQUE

- FEATURES
  - Added the ability to route inbound messages to separate systems on a per-driver basis.
  - Enhanced the ability for the TORQUE API to send messages based on the power unit.
- BUG FIXES
  - Resolved an issue where deadheads were incorrectly being placed in front of splits.

## Groups Organization
