Release Notes

Release Date: 11/28/2023

RELAY

- FEATURES
  - Enhanced the ability to search by power unit number.
  - Improved the functionality of the driver groups visibility configuration by only showing the types of groupings used by the tenant.
- BUG FIXES
  - Fixed a bug where users with document-only access were not seeing all drivers in a group.
  - Resolved an issue with exports only working for users with full RELAY access.
  - Resolved an issue with searching for messages or forms when groups are consolidated.

ROLLER

- FEATURES
  - Added support for dark mode when driving.
  - Made the username field case-insensitive for sign-in.
- BUG FIXES
  - Fixed a bug where sounds did not work for notifications.
  - Resolved an issue where viewing older images in Messages crashed the app.

ROLLER Desktop

- FEATURES
  - Added link configuration settings to categories. See image, "Link Configuration."
  - Improved the process for configuring field conditions.

TORQUE

- FEATURES
  - Added new tractor data from TMWSuite to the Eleos integration.
- BUG FIXES
  - Resolved some workflow mapping issues for the Platform Science integration.

WIRE

- BUG FIXES
  - Resolved an internal server error specific to a customer.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
