Release Notes

Release Date: 1/23/2024

RELAY

- FEATURES
    - Added settings for managing the visibility of driver and power unit details in the Drivers column, and updated the appearance of those details for the drivers. See image, "Driver Details."
    - Added the consolidation of groups based on a carrier's group organization settings.
    - Updated the document review permissions to include read-only for users in primary and secondary departments.
- BUG FIXES
    - Resolved an issue where notifications were being received if a user had them turned off.
    - Resolved an issue with the hyperlink to a driver's message history being added to the document rejection message text for a driver in a hidden group.

ROLLER

- BUG FIXES
    - Resolved an issue with conditional fields not showing if a source field is hidden.

ROLLER Desktop

- FEATURES
    - Added an opt-in for including form data in emails sent with signatures and documents. See image, "Form Data Opt-In."
    - Updated the subject of the email to match the filename of the document being sent.

TORQUE

- FEATURES
    - Added the ingestion of HOS rulesets via the Samsara integration.
    - Added support for adjusting the next step upon arrival at the shipper based on a driver's live load response.
    - Updated the connection protocol with the Platform Science queues.
- BUG FIXES
    - Resolved an issue handling special characters in fields.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

WIRE

- FEATURES
  - Added an integration with Macropoint.
  - Added support for Four Kites integrations leveraging EDI 204 and EDI 214 transactions.
