

Release Notes

Release Date: 2/6/2024

RELAY

- FEATURES
 - Added a tenant-level setting that either gives users control of the automatic read status of a message or allows a user manual control of the status. See image, “Read Message Handling.”
 - Added the ability to show or hide groups when in the consolidated view. See image, “Show or Hide Groups in Consolidated View.”
 - Added the export of messages and forms for drivers who have been disabled. See image, “Export Messages and Forms for Disabled Drivers.”
 - Made performance enhancements for refreshing groups when using Google Chrome.
 - Removed a field label from a rejected document message if the field’s value is null.
- BUG FIXES
 - Resolved an issue with a rejected document message appearing on new incoming documents.
 - Resolved an issue with messages refreshing while a user was typing in the field.

ROLLER

- FEATURES
 - Made the tenant and username fields at sign-in case-insensitive.

ROLLER Desktop

- FEATURES
 - Added functionality to use date and time or numeric fields to conditionally show or hide other fields. See image, “Use Date and Time or Numeric Fields for Conditionals.”
 - Added settings for including email hyperlinks in announcements. See image, “Add an Email Address to Announcements.”
- BUG FIXES
 - Resolved an issue with URLs for Announcements and Links not allowing URL extensions.
 - Resolved an issue with user groups being included in the driver group selection fields in document settings.

TORQUE

- FEATURES
 - Added a new status to alert drivers to scan missing paperwork for completed loads for the Truckmate integration.
 - Added notes for nonbillable stops for the TMW integration.
 - Updated the driver sync for Geotab to include DOT numbers.

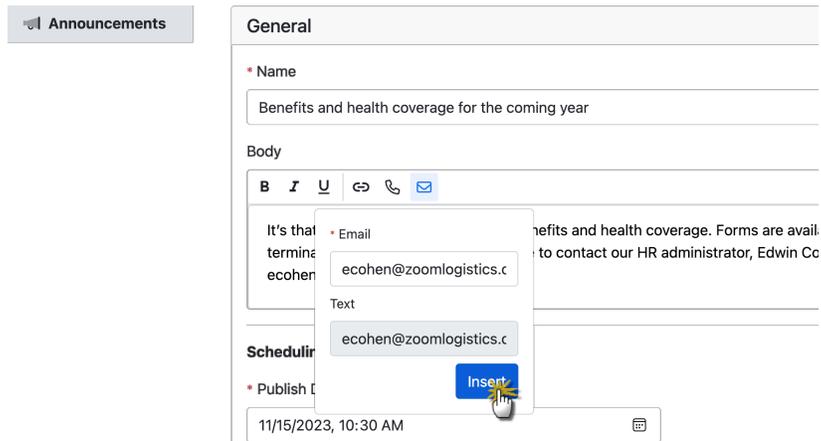

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- **BUG FIXES**
 - Resolved a mapping issue with the Texas 70-hour Intrastate ruleset for the Platform Science integration.
 - Resolved an issue with cross-dock loads erroring on an update for the TMW integration.

WIRE

- **BUG FIXES**
 - Resolved a consistency issue with search dates.
 - Resolved a Project 44 caching problem.
