 - Added settings to choose what fields will be included in document rejection messages. See image, “Specify the Fields to be Included in Document Rejection Messages.”

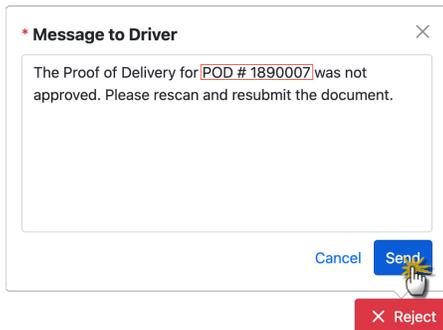

TORQUE

- FEATURES
 - Added a summary of the freight details for the ROLLER integration.
 - Added the ability to store error messages to TMWS Notes.
 - Added form-level trailer validation to the Eleos integration.
 - Added the ability to allow the trip status to be changed based on the first stop’s stop event for the Eleos integration.
 - Completed the required migration of AMQP connections required by Platform Science.

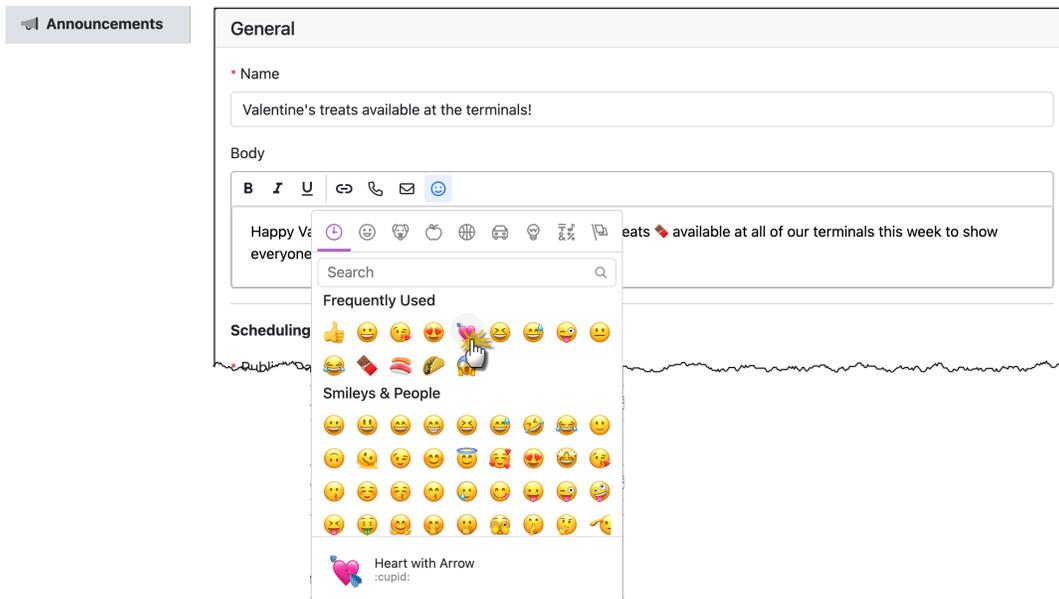

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- BUG FIXES
 - Improved an error message for the start of a trip where the step was already completed.
 - Improved an error message that happened due to a latitude, longitude error.
 - Resolved an issue receiving power unit pings without an associated driver ID which caused an error sending a message.
