

Release Notes

Release Date: 4/16/2024

RELAY

- BUG FIXES
 - Resolved an issue where quickly navigating driver groups caused the names to appear as tooltips.

ROLLER

- FEATURES
 - General maintenance and performance improvements.

ROLLER Desktop

- FEATURES
 - Added the creation of signature fields. See image, “Create a Signature.”
- BUG FIXES
 - Resolved an issue where past publish dates still triggered a warning to adjust the date before the expiration date.

TORQUE

- FEATURES
 - Added a calculation using odometer readings to determine the distance between check calls for customers using the TMW integration with the Samsara provider.
 - Added the capture of team drivers when processing duty status updates from the ORBCOMM provider and display the data in the Eleos app.
 - Added support for auto-arrivals and departures for the ORBCOMM provider.
 - Added support for sending and processing workflow to and from team drivers for customers using the McLeod integration with the Eleos provider.
 - Added support for Workflow to and from team drivers in ROLLER.
 - Improved the handling and processing of message data flow.
 - Set a 45-day TTL for HOS snapshots.
- BUG FIXES
 - Resolved an issue where RELAY errors appeared for some customers due to a bug in Microsoft Azure.
 - Resolved an issue where upon completion of a load, the next load should be the one with the earliest pickup date.
 - Resolved an issue with load assignment messages not displaying the correct data due to an unknown field type.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
