Motorcity Systems

# Release Notes

Release Date: 5/14/2024

## ADMIN

- FEATURES
  - Added filtering to the Trailers grid. See image, “Trailers Filtering.”
- BUG FIXES
  - Resolved an issue where SMS opt-in messages were not being sent when a driver’s mobile number was updated.

## RELAY

- FEATURES
  - Added support for messaging per department for Eleos integrations.
  - Changed the menus for sorting and filtering the groups and drivers columns to icons and moved group consolidation. See image, “Icons for Sorting and Filtering the Groups and Drivers Columns.”
- BUG FIXES
  - Resolved an issue where accepted and rejected documents were not being removed from the Open list until the page was refreshed.
  - Resolved an issue where the number of pages in a document was not being updated when navigating between documents until the page was refreshed.
  - Resolved an issue where the styles were not being maintained when navigating document resubmissions.
  - Resolved an issue with toast messages not appearing when a document was accepted or rejected for a department other than the one being viewed by the user.

## ROLLER

- FEATURES
  - Added the acceptance of an end-user license agreement before using navigation.
  - Added the rescan and resubmission of documents for trips and activities. See image, “Document Rescan and Resubmission.”
  - General maintenance and performance improvements.

**We value your feedback!** If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

## ROLLER Desktop

- FEATURES
  - Added validation to the filename patterns for document types fields.

## TORQUE

- FEATURES
  - Added a setting in the Geotab integration to sync driver passwords on update. See image, “Geotab Setting for Syncing Driver Passwords.”
  - Added logic to prevent the last updated date and user from writing to the master file when position or HOS data is updated for the TMWSuite integration.
  - Added messages sent by the driver to the TruckMate message viewer.
  - Added power unit settings to the ORBCOMM integration to prevent the processing of heartbeats and other data if the power unit does not exist or is not enabled in ADMIN. See image, “ORBCOMM Settings for Power Units.”
  - Added support for team drivers to the Eleos integration for carriers using McLeod.
  - Added the last known location to the weather conditions form sent by a driver for the Platform Science integration.
  - Added the pre- and post-processing of forms to show dispatchers errors and other updates in RELAY for the TMWSuite integration.
  - Added trailer position processing to the TruckMate integration.
  - Improved existing functionality to remove pay and deadhead details associated when a driver rejects a trip for the TMWSuite integration.
- BUG FIXES
  - Resolved an issue where drivers previously using CoPilot were assigned a new product license after being disabled.
  - Resolved an issue where geofence breaks not matching the current stop were unnecessarily being written to the Notes table in TMWSuite.
  - Resolved an issue where odometer readings were not being converted to miles for Orbcomm integrations.
