

Release Notes

Release Date: 6/11/2024

ADMIN

- FEATURES
 - Improved page styling for overall design consistency.

RELAY

- FEATURES
 - Added the icons for messages, documents, and help to the bottom of the consolidated and collapsed views. See image, “Icons in Consolidated and Collapsed Views.”
- BUG FIXES
 - Addressed an issue with resolved form errors showing as unresolved in the driver search.
 - Resolved an issue where the driver card was larger than necessary if the power unit ID was not configured in Application Settings.
 - Resolved an issue with drivers and power units not showing in the search preview.

ROLLER

- FEATURES
 - Added an indicator to the app sidebar to alert a driver if an active trip needs attention. See image, “Trip Action Needed Indicator.”
 - Added the ability to open hyperlinks configured with custom parameters.
 - Added the ability to dynamically use trip or stop metadata for action names on steps.
 - General maintenance and performance improvements.
- BUG FIXES
 - Cleared a driver’s CoPilot credentials on sign out so that a driver may use multiple mobile devices.
 - Resolved an issue where a driver had access to a trip they were unassigned from.
 - Resolved an issue where a driver was not receiving new message notifications while in another thread.

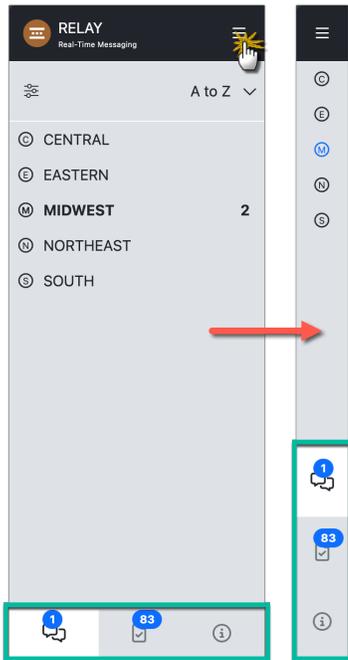

ROLLER Desktop

- FEATURES
 - Added the ability to use custom parameters when configuring hyperlinks. See image, “Use Custom Parameters in Hyperlinks.”

TORQUE

- FEATURES
 - Added read receipts to RELAY indicating that a driver read a message within the Transflo app.
 - Added settings for sending documents by email, FTP, or SFTP scanned in from the Transflo app to a destination chosen by the carrier. See image, “Send Transflo Documents.”
 - Added shipment information to the driver's HOS logs at the start of a trip for Geotab drivers.
 - Added the display of HOS data for solo and team drivers for customers using both Eleos and Geotab.
- BUG FIXES
 - Resolved an issue adding a begin bobtail to the first leg of a split trip caused an error with TMWSuite.
 - Resolved an issue where all dispatched loads were being sent to ROLLER instead of the loads that were dispatched and assigned a driver.
 - Resolved an issue where the personal conveyance calculation for Geotab was incorrect.

Trip Action Needed Indicator

The screenshot shows the Zoom Trucking & Logistics mobile application interface. On the left is a navigation menu with options: Home, Current Trip, Trips (highlighted with a red arrow), Hours of Service, Messaging, Document Scanning, Activities, Settlements, and History. At the bottom of the menu is the ROLLER logo and a 'Sign out' button. The main content area is titled 'Trips' and has two tabs: 'Active Trips' and 'Completed Trips'. Below the tabs is a table with the following data:

Trip	First Stop	Last Stop	Status
Load# 2000102	Morrisville, PA May 15 • 09:59	Lansing, MI May 17 • 08:59	Upcoming ⚠ Action needed

Use Custom Parameters in Hyperlinks

The screenshot shows the 'Geotab Drive' configuration screen in the app. It includes a 'Links' button on the left. The main configuration area has the following settings:

- Enabled:**
- Type:** App
- URLs:**
 - Android URL:** geotabdrive://{{screen}}/{{screen2}}
 - Android Fallback URL:** https://play.google.com/store/apps/details?id=com.geotab.androidCheckmate&hl=en_US&gl=US
 - iOS URL:** geotabdrive://{{screen}}/{{screen2}}
 - iOS Fallback URL:** https://apps.apple.com/tt/app/geotab-drive/id921754134

At the bottom, there is a preview card for 'Geotab Drive' with the text 'View HOS in Geotab Drive' and a share icon.
