Release Notes

Release Date: 6/25/2024

ADMIN

- FEATURES
    - Added a trailer's location to the map on the trailer profile if the location data is available. See image, "Trailer Location on a Map."
    - Improved page styling for overall design consistency.

RELAY

- FEATURES
    - Updated the power unit view to group and lasso team drivers together. See image, "Grouping Team Drivers Together."

ROLLER

- FEATURES
    - Added links to workflows and trip details. See image, "Links on a Trip."
    - Alphabetized the activities listed on the Start an Activity screen.
    - General maintenance and performance improvements.
    - Improved links by adding metadata to the link syntax.
    - Improved the appearance of images in the announcement modal.

ROLLER Desktop

- FEATURES
    - Added notifications of unsaved changes if a user navigates away from the Mobile App Menu and Messaging screens.
    - Added screens to create and manage activities.
    - Improved page styling for overall design consistency.
- BUG FIXES
    - Resolved an issue where some form data sent by email displayed a field's ID instead of the label.

TORQUE

- FEATURES
    - Added driver pre-registration and the ability to disable drivers to the Transflo integration.
    - Added the processing of breadcrumbs to the Transflo integration.
    - Added workflow processing to the Transflo integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

1

- BUG FIXES
    - Resolved an issue to accept empty forms that are URL-encoded for the Eleos integration.
    - Resolved an issue where the billable status of specific stop types changed when dispatched.
    - Resolved an issue where various scheduled data syncs were not running simultaneously.

Grouping Team Drivers Together
