

Release Notes

Release Date: 7/23/2024

RELAY

- FEATURES
 - Added the association of workflow errors that have been resolved or resubmitted with the Workflow toggle to give the user the option to remove them from view in a driver's message thread.
 - Added the message status as a hover over the outbound error icon. See image, "Message Status on the Outbound Error Icon."
 - Upgraded RELAY's search functionality. See image, "Upgraded RELAY Search."
 - Visit the support page for details. <https://motorcity.zendesk.com/hc/en-us/articles/23514447971095-Search-with-Terms-and-Operators>
- BUG FIXES
 - Resolved an issue where not all drivers appeared in the consolidated driver view after signing in or refreshing the screen.

ROLLER

- FEATURES
 - Added functionality to play a sound when a message is received while the driver is in motion or using turn-by-turn navigation.
 - Added logic to use custom parameters to control the visibility of trip links.
 - Added logic to use driver metadata to update link names on the Links page.
 - General maintenance and performance improvements.
 - Improved the creation of document history items in regard to drivers uploading documents to prevent failure if the app is closed.
- BUG FIXES
 - Resolved an out of memory app crash issue.

ROLLER Desktop

- FEATURES
 - Added the ability to use a rule in multiple workflows.
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Added logic to use the base app URL as a fallback for links if additional parameters are not valid.
 - Added sorting to the Signatures and Rules grids based on name.
 - Improved the handling of removing a driver from a trip.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- Resolved an issue where supplemental actions on trips did not immediately appear during configuration.
- Resolved an issue with items disappearing from the Mobile App Menu if a user signed out while on that screen.

TORQUE

- FEATURES

- Added logging and logic to retry driver accounts that errored or failed during batched process license assignment for the CoPilot integration.
- Added logging and logic to retry forwarding a document if it fails to send over FTP or SFTP for the Eleos integration.
- General maintenance and performance improvements.
- Made an adjustment to the DMT date and time value to be ahead of the pickup date and time value based on the driver's ETA for the TMW integration.
- Updated the handling of commodity descriptions on orders to use the user's rewritten description instead of the default description in TMWSuite.

- BUG FIXES

- Resolved an issue with an influx of authorization calls being cached when shipments are added or removed for the Geotab integration.
- Resolved an issue with TMW's apocalypse date cascading to future stops.
