

Release Notes

Release Date: 8/6/2024

IDENTITY

- FEATURES
 - Added administrative user access level controls for ROLLER.

RELAY

- FEATURES
 - Added the document rejection message to the rejected document's details. See image, "Document Rejection Message."
 - Added visibility of the read status, or the change of read status, to messages from a driver. See image, "Message Status of Driver Messages."
- BUG FIXES
 - Resolved an issue where documents that underwent review and needed to be rescanned showed an incorrect status after being approved.
 - Resolved an issue where undoing a document's dismissal deselected it from the document list.

ROLLER

- FEATURES
 - Added the Links card to the Home screen. See image, "Links on the Home Screen."
 - General maintenance and performance improvements.
- BUG FIXES
 - Resolved an issue where the app would try to update a form on a deleted trip if the form was open on a device.
 - Resolved an issue where the original document ID was not showing in the item's history.
 - Resolved an issue with items in History missing the date of the last update.

ROLLER Desktop

- BUG FIXES
 - Corrected the appearance of bolding and underlining text with emojis for announcements.
 - Removed unused fields from the filename pattern creation feature for documents.

TORQUE

- FEATURES
 - Added support for dispatching team drivers for the TMWS integration with Eleos.
 - General maintenance and performance improvements.
 - Updated the TORQUE Client to .NET 8.
 - Updated the user interface of the Comdata settings page.
- BUG FIXES
 - Added error handling for activities in ROLLER.
 - Resolved an issue where fuel consumption data was being duplicated on some trips for the Geotab integration.
 - Resolved an issue with errors occurring on batch uploads of orders that halted processing.
