

Release Notes

Release Date: 8/20/2024

RELAY

- FEATURES
 - Added the visibility of communications warnings and errors on drivers to the groups panel. See image, “Communications Warnings and Errors Visibility.”
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Resolved an issue where an inbound message status did not appear in the search result preview.
 - Resolved an issue where the outbound message status was being cut off if the message was short.

ROLLER

- FEATURES
 - Added a notification for the driver if they are outside the defined trailer location radius.
- BUG FIXES
 - General maintenance and performance improvements.

ROLLER Desktop

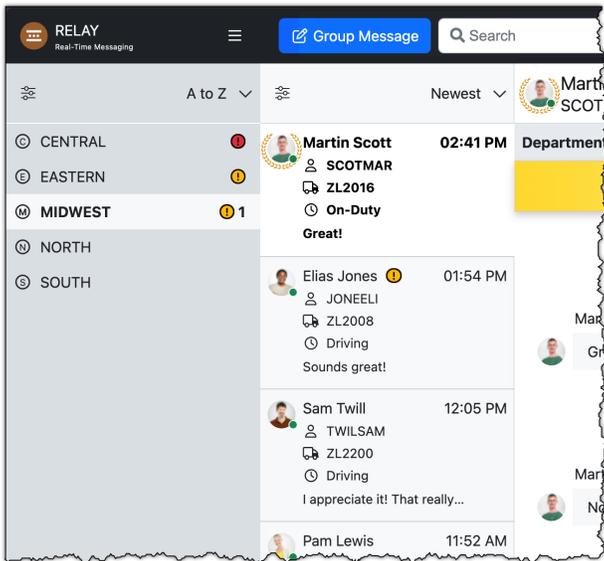

- FEATURES
 - Added a preventative measure to not allow a form from being disabled if part of a rule or activity. See image, “Prevent Forms in use from being Disabled.”

TORQUE

- FEATURES
 - Added a stop at the end of a trip for dropping a chassis to the TMWSuite integration.
 - Added batch syncing for trailers.
 - Added support for a second trailer to the TMWSuite integration.
 - Added support for the creation of chassis, containers, and trailers to the TMWSuite integration.
 - General maintenance and performance improvements.
 - Updated the user interfaces for the Omnitrac, SkyBitz, and Wex EFS providers.
- BUG FIXES
 - Resolved an issue with the TORQUEClient3 sync frequency.
 - Resolved an issue with trip errors preventing other loads from being sent for the TruckMate integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

Communications Warnings and Errors Visibility

Prevent Forms in use from being Disabled
