Release Notes

Release Date: 9/3/2024

RELAY

- FEATURES
  - Improved page styling for overall design consistency.
- BUG FIXES
  - Resolved an issue where both types of error indicators showed on the driver group at the same time.

ROLLER

- FEATURES
  - Added ability to view and navigate to a trailer's last known location. See image, "Trailer Location on a Trip."
  - General maintenance and performance improvements.

ROLLER Desktop

- FEATURES
  - Added settings to allow a driver to view and navigate to a trailer's last known location on a rule. See image, "Trailer Location Settings on a Rule."
  - Added conditional settings on rules. See image, "Conditional Settings on Rules."
- BUG FIXES
  - Resolved an issue where a rule could not be saved after an action was deleted.

TORQUE

- FEATURES
  - Added access key ID fields, the syncing of heartbeats, and updated the user interface for the PeopleNet integration.
  - Added a measure to prevent out-of-service trailers from being used on a trip for the TMWSuite integration.
  - Added a measure to prevent errors not requiring action by a user from being sent to RELAY.
  - Added the ability to drop a chassis from a user-defined list of locations to the TMWSuite integration.
  - Added the ability to create trailer expiration dates when creating chassis and containers for the TMWSuite integration.
- BUG FIXES
  - Resolved an issue where the TMStatus did not update at the start trip for the TMWSuite integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
