

Release Notes

Release Date: 1/21/2025

ROLLER

- FEATURES
 - Updated the default sorting for Active Trips and Completed Trips to be ascending and descending, respectively.
- BUG FIXES
 - Resolved an issue where a driver could select multiple options in a single-select dropdown menu.

ROLLER Desktop

- FEATURES
 - Added configuration settings to a rule to show a step or action based on the stop order on a trip. See image, “Step or Action Visibility Based on Stop Order.”

TORQUE

- FEATURES
 - Added the ability to retrieve more than one day of data to the Samsara integration.
 - Added the calculation of miles and minutes to the final destination on a trip when processing check calls to the TMWSuite integration.
 - Added the syncing of locations with geofences to the Samsara integration.
