

Release Notes

Release Date: 2/18/2025

IDENTITY

- FEATURES
 - Added a field to specify the tenant's default primary department for users created by Microsoft Entra.

RELAY

- FEATURES
 - Added the ability to include images with scheduled messages. See image, "Add Images to Scheduled Messages."
 - Added logic to prevent dispatchers from sending messages to drivers who do not have access to the same primary department for carriers using ROLLER.
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Resolved an issue with errors showing as unresolved when a filter was reset.

RELAY Mobile

- FEATURES
 - RELAY Mobile is available for download on both the Google Play and Apple App stores.
 - Google Play
<https://play.google.com/store/apps/details?id=com.relaymobile.prod&pli=1>
 - Apple App Store
<https://apps.apple.com/us/app/relay-messaging/id6737570590>
 - Users can,
 - Message and call individual drivers,
 - Message groups of drivers,
 - Receive push notifications,
 - Search for drivers and power units,
 - View driver groups, and
 - View information for drivers including HOS clocks and current location.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

ROLLER

- FEATURES
 - Added validation to text fields enforcing minimum, maximum, and exact character count requirements.
 - General maintenance and performance improvements.
 - Updated the document scanning capture component. See image, “Document Scanning Capture Updates.”

TORQUE

- FEATURES
 - Added a helper function to replace special characters passed in from workflow forms.
 - Added the ability to control stops from TMWSuite sent to the Transflo integration.
 - Added the capture of SendGrid errors to the runtime log for the Eleos provider.
 - Updated master data sync processes to override and preserve data using ADMIN.
 - Updated personal conveyance to be an off-duty status.
- BUG FIXES
 - Resolved a potential queue connection bug within the Platform Science integration.
 - Updated the runtime log events to match the available event data.

WIRE

- FEATURES
 - Added criteria to filter transactions by errors.
