

# Release Notes

Release Date: 3/4/2025

## RELAY

- FEATURES
  - Improved page styling for overall design consistency.

## RELAY Mobile

- FEATURES
  - Added unread message filtering to the groups and drivers views. See images, “Unread Message Filtering.”
  - General maintenance and performance improvements.

## ROLLER

- FEATURES
  - General maintenance and performance improvements.
  - Improved text fields by adding validation supporting character counts.
  - Improved the ordering and behavior of unread and read announcements on the Home screen.
- BUG FIXES
  - Added URL encoding for system or external validation.

## ROLLER Desktop

- FEATURES
  - Added settings for character count requirements to text fields for documents and forms. See image, “Character Counts on Text Fields.”
  - General maintenance and performance improvements.
- BUG FIXES
  - Resolved an issue where a user was unable to save a field on documents and forms due to unchecking the conditions box.
  - Updated duplicate ID checks to be case-insensitive.

## TORQUE

- FEATURES
  - Added logic to prevent pending EDI loads from being sent to the Qued provider.
  - Added logic to send loads to ROLLER if a driver and carrier have been assigned for the TMWSuite integration.
  - Added new fields from contracts for the Qued integration.

---

**We value your feedback!** If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to [support@motorcity.systems](mailto:support@motorcity.systems).

- Improved the logic for accepting loads for future assignments for the Optimal Dynamics integration.
- Made recommended changes for driver assignments to the Optimal Dynamics provider to support the integration with TruckMate.
- **BUG FIXES**
  - Resolved an issue where an SMS can be sent to a driver with a Twilio provider even though the driver has opted out of SMS.
  - Resolved an issue where last stops disappeared if creating or changing a final stop was allowed.
  - Resolved an issue where stop triggers with the Qued integration prevented settlements in TMWSuite from saving.
  - Resolved an issue where the load assignment message for the TruckMate integration was moving appointment times occurring after 3pm to the previous day.
