

Release Notes

Release Date: 3/18/2025

ADMIN

- BUG FIXES
 - Resolved an issue where the visibility of users in the dropdown menu for a group was limited to the first 500 users.

RELAY

- FEATURES
 - Added functionality enforcing that users should only interact with drivers in departments associated with their business units. See image, “Restrict Users Messaging Drivers Associated with Other Business Units and Departments.”
 - Added the ability to resolve high-priority and urgent forms from ROLLER. See image, “Resolve High-Priority and Urgent Forms.”

RELAY Mobile

- FEATURES
 - Added logic to restrict users from messaging drivers if a driver’s business unit is not associated with a user’s primary department. See image, “Restrict Users Messaging Drivers Associated with Other Business Units and Departments.”
 - Added support for deep links.

ROLLER

- FEATURES
 - Added functionality to use polygonal geofences to trigger auto-arrivals and departures on trips.
 - Added functionality to submit images with forms and view them in History. See image, “View Images Submitted with a Form.”
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Resolved an issue with disabled trailers continuing to pass trailer validation.
 - Resolved an issue with temporary files not being deleted.

ROLLER Desktop

- FEATURES
 - Added a setting to allow a high-priority or urgent form to be resolved in RELAY. See image, “Setting to Resolve a High-Priority or Urgent Form.”
 - Added configuration settings to compare text fields on documents and forms. See image, “Comparison Rules for Text Fields.”
 - Added image configuration and image field type to forms. See image, “Image Field on Forms.”
- BUG FIXES
 - Resolved an issue saving valid URLs.

TORQUE

- FEATURES
 - Added new health checks to the TMWSuite and TruckMate integrations.
 - Implemented additional checks to alert developers if a process does not start up properly during a deployment.
- BUG FIXES
 - Improved event error logging for the Qued integration.
 - Resolved an issue where load assignments were sent out to drivers not present in ADMIN.
 - Resolved an issue with daylight savings time not updating properly for load assignment messages with the TruckMate integration.
