

Release Notes

Release Date: 4/1/2025

RELAY

- FEATURES
 - Added visibility to the recipients of a group message. See image, “View Recipients of a Group Message.”
 - Visit the support page for details. https://motorcity.zendesk.com/hc/en-us/articles/4406912731159-Send-a-Group-of-Drivers-a-Message#h_01JQCB0WWAKXW0DVHEMRQEYV7D
 - Improved the functionality of the buttons to show or hide form details and allow resubmission if there are errors with a form.

RELAY Mobile

- FEATURES
 - Added badges to the app icons for both Android and iOS platforms.
 - Added special events to both the driver’s profile and individual message thread. See image, “Special Events for Drivers.”

ROLLER

- BUG FIXES
 - Resolved an issue deleting documents.
 - Resolved an issue sorting the Completed Trips grid.
 - Resolved an issue where the time on a form adjusted to a previous time zone.

ROLLER Desktop

- FEATURES
 - Added logic to prevent images that are part of forms from being disabled.
 - Added settings to use ELD load assignment integration and allow auto-arrivals and departures from driver devices. See image, “ROLLER Desktop Settings.”

TORQUE

- FEATURES
 - Added the ability to allow an unlimited number of references to be added at a time when integrating with the TMS.
 - Improved the functionality of the Transflo integration by ensuring that the driver is removed from the original workflow when a trip is re-assigned to a different driver.
 - Improved the update logic between the Qued and TMWSuite integrations.
 - Updated the sign in and out process to use a driver's duty status for the Samsara integration.
- BUG FIXES
 - Resolved an issue where event data was being duplicated for the Motive integration.
 - Resolved an issue where form messages appeared in RELAY, but not in the TORQUE Client.
 - Resolved some issues with various services not sending information for the Optimal Dynamics and Qued integrations.
 - Resolved some threading issues with TORQUE Client.
