

# Release Notes

Release Date: 5/28/2025

## RELAY

- BUG FIXES
  - Improved performance by optimizing the logic around business units and driver data.
  - Resolved an issue where long horizontal images prevented a driver's message thread from being completely visible.

## RELAY Mobile

- FEATURES
  - Added visibility to priority forms and errors in driver groups and message threads. See image, "View Priority Forms and Errors."

## ROLLER

- FEATURES
  - Improved page styling for overall design consistency.
  - Updated the appearance of stops adding the appointment date and time. See image, "Appointments on Stops."

## ROLLER Desktop

- FEATURES
  - Added more granular criteria to control the review of documents by driver or driver group. See image, "Inclusion and Exclusion of Drivers and Groups for Document Review."
  - Added controls to hide read-only and hidden fields from RELAY users. See image, "Visibility Controls for Read-Only and Hidden Fields in RELAY."

## TORQUE

- FEATURES
  - Added a setting for arrival dates and the creation of deadheads to driver assignments for the TMWSuite integration with Optimal Dynamics.
  - Added insurance expirations to the carrier creation process for the Highway integration.
  - Added logic to allow a trip to start if there are no previous in-service moves for an asset for the TMWSuite integration.
  - Added logic to only allow a driver to work active stops for the Eleos integration.
  - Added settings to configure events for the Samsara provider.
  - Added support updates to driver logs when fields are blank or null for the TMWSuite integration.
