

# Release Notes

Release Date: 6/10/2025

## RELAY Mobile

- FEATURES
  - Added the ability to send a group message to drivers using classifications. See image, “Send Group Messages Using Classifications.”
  - Added the total number of new messages on the driver group.
- BUG FIXES
  - Resolved an issue where the fields in a form messages not sent from ROLLER were not correctly ordered.

## ROLLER

- FEATURES
  - General maintenance and performance improvements.
- BUG FIXES
  - Resolved an issue where canceled trips were not being automatically removed from a driver’s device.

## TORQUE

- FEATURES
  - Added an option for the Optimal Dynamics integration to always allow for deadheading even if the end and start of a trip are at the same location and improved the error messaging.
  - Added logic to not change billable empty stops at the beginning of a trip to non-billable stops for the TMWSuite integration.
  - Added new geofencing data elements for the Samsara integration.
  - Added support for displaying the actual arrival and departure times for stops in ROLLER.
  - Added the flexibility to allow for disabling of date-time cascading at the start of a trip.
  - Improved page styling for overall design consistency.
- BUG FIXES
  - Resolved an error that stated no active legs were found on driver assignments with deadhead when legs did exist for the Optimal Dynamics integration.
  - Resolved an issue to resume batch processing of loads stopped when a load in the batch has an error skipping the problematic load.
  - Resolved an issue where leg numbers were missing from errors for the TMWSuite integration.
  - Resolved an issue where some telemetry data for the Samsara integration was not correctly populating.
  - Resolved an issue where the stop-action filters for Eleos were not working as expected when used in conjunction with ROLLER.

---

**We value your feedback!** If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to [support@motorcity.systems](mailto:support@motorcity.systems).

- Resolved an issue with the Optimal Dynamics integration where a current trip was not found due to the lookup using the last trip information.
- Resolved a null error received when looking up mileage cache in TMWSuite.
- Resolved issues with the formatting of data elements used for the Samsara integration.

## WIRE

- FEATURES
  - Added settings to define the recipients of error emails. See image, “Define the Recipients of Error Emails.”
- BUG FIXES
  - Resolved an issue with resubmission not working if the 204 error was too long.
