

# Release Notes

Release Date: 6/24/2025

## IDENTITY

- BUG FIXES
  - Resolved an issue syncing user information from Microsoft Entra.

## RELAY

- FEATURES
  - Changed the label for events on the drivers column filter to “Celebrations.” See image, “Updated the Filter Label to ‘Celebrations.’”

## ROLLER

- FEATURES
  - Added support for deep linking to navigation from third-party applications.
  - Updated the deep linking for the Geotab add-in.

## ROLLER Desktop

- FEATURES
  - Added configuration settings to forms for a standard delivery method. See image, “Standard Delivery Method for Forms.”
  - Updated the button preview for document scanning fields.
  - Updated the error handling when adding conditional fields to steps and actions.
- BUG FIXES
  - Resolved an issue to support multiple source fields on a rule.

## TORQUE

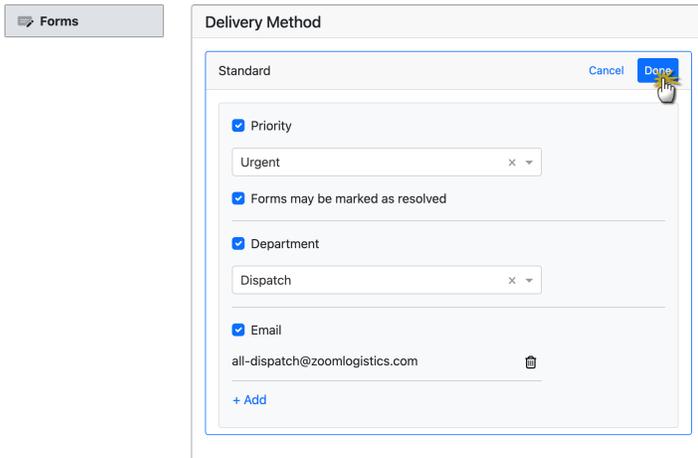

- FEATURES
  - Added a common location to check calls from Geotab for drivers and power units.
  - Added a priority level to driver trip change messages so they can be read aloud to the driver.
  - Added mapping for onboarding carriers when creating a carrier, and carrier change alerts for the Highway integration.
  - Added more debugging and updated to always use the second version of the API for integrating with Transflo.
  - Added support for team drivers integrating with both Optimal Dynamics and TMWSuite.
  - Added the previous trip number to the logs for deadheads for the Optimal Dynamics integration.
  - Trimmed extra spaces from stop event codes for a customer integrating with TMWSuite.

---

**We value your feedback!** If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to [support@motorcity.systems](mailto:support@motorcity.systems).

- Updated the load status for driver assignments with deadhead for a customer integrating with both Optimal Dynamics and TMWSuite.
- **BUG FIXES**
  - Resolved an error reading power unit and geofence names if there are null values for the Samsara integration.
  - Resolved an issue with planned loads being visible to both shift and non-shift drivers for a customer.

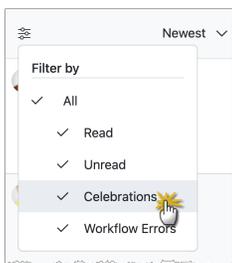

## Standard Delivery Method for Forms

The screenshot shows a 'Forms' tab on the left and a 'Delivery Method' configuration window on the right. The window has a title bar with 'Standard' and buttons for 'Cancel' and 'Done'. It contains several settings:

- Priority: Urgent (dropdown menu)
- Forms may be marked as resolved
- Department: Dispatch (dropdown menu)
- Email: all-dispatch@zoomlogistics.com (with a trash icon)
- + Add

## Updated the Filter Label to “Celebrations”

The screenshot shows a filter dropdown menu with the following options:

- Filter by
- ✓ All
- ✓ Read
- ✓ Unread
- ✓ Celebrations (highlighted with a mouse cursor)
- ✓ Workflow Errors
