

Release Notes

Release Date: 8/19/2025

IDENTITY

- FEATURES
 - Added new access levels for RELAY to control permissions for messaging-related features. See image, “Message-Related Access Levels for RELAY.”

RELAY

- FEATURES
 - Improved page styling for overall design consistency.

ROLLER

- FEATURES
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Improved the performance and screen transitioning when a device is rotated between portrait and landscape modes.

ROLLER Desktop

- FEATURES
 - Added column filtering to the Rules grid.

TORQUE

- FEATURES
 - Added functionality to the Samsara integration to parse the city, state, and zip code from check calls in order to populate fields in TMWSuite.
 - Enhanced functionality to match locations sent from ADMIN to ROLLER based first on location ID and then on location name.
 - Enhanced the geofence location integration to support importing, exporting, and two-way synchronization with Samsara.
 - Separated trailer and power unit geofences breaks for the Samsara integration.
