

Release Notes

Release Date: 9/3/2025

ADMIN

- FEATURES
 - Added a map to display geofences for locations. See image, “Geofences for a Location.”

RELAY Mobile

- FEATURES
 - Added checks so only users with the proper access levels may view driver details and group messages.

ROLLER

- FEATURES
 - Added a check to optimize CoPilot navigation on sign in for drivers with active licenses.
- BUG FIXES
 - Improved the performance and screen transitioning when a device is rotated between portrait and landscape modes.

ROLLER Desktop

- FEATURES
 - Added a setting for PDF compression to documents. See image, “PDF Compression Setting.”
 - Added configuration settings to support the automatic population of shipping documents for Samsara customers. See image, “ELD Shipment Assignment Settings.”
 - Improved page styling for overall design consistency.
- BUG FIXES
 - Resolved an issue where rules having multiple conditional steps and actions only validation against one field.

TORQUE

- FEATURES
 - Added a filter to the runtime log to narrow by load assignment for the Samsara integration.
 - Added functionality to skip check call creation for assets that do not exist in the TMWSuite integration.
 - Added functionality to truncate location data when parsing descriptions for the Samsara integration.
 - Added mapping for additional heartbeat data to extra fields for the TMWSuite integration.
 - Added SFTP support to the Optimal Dynamics integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
