

Release Notes

Release Date: 10/28/2025

ADMIN

- FEATURES
 - Added a new tab to driver profiles, External IDs, to manage external providers and IDs configured for the tenant. See image, “External IDs Tab on a Driver’s Profile.”

GAUGE

- FEATURES
 - Added a new section, Device Usage, to the RELAY Analytics report to provide insight into RELAY Mobile app usage.

IDENTITY

- FEATURES
 - Updated the header, sidebar, and styling elements for design consistency.

RELAY

- FEATURES
 - Added a label to forms submitted from a geofence break from ROLLER in the message thread to improve visibility without the need to expand the form details. See image, “Form Submitted as a Result of a Geofence Break.”

ROLLER

- FEATURES
 - Added support for embedded CoPilot when using the Find My Trailer feature.
 - Enhanced document submission to better support large, multiple-page uploads.
- BUG FIXES
 - Resolved an issue where toggles did not display correctly for devices using iOS v26.0 and greater.

TORQUE

- FEATURES
 - Added an option for carriers using TMWSuite to create a carrier load requirement based on information received from the Highway integration.
 - Added configurable messages for drivers and dispatchers based on the conditions of a geofence break.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- Added logic to update fields in TMWSuite when ROLLER sends arrivals or departures based on geofence breaks.
- Added logic to use the carrier's DOT number as the carrier ID when creating a new carrier for Highway integrations using TMWSuite.
- Added support for case insensitivity with single sign-on (SSO) for Geotab integrations with ROLLER.
- Added support for radial geofences in location exports.
- **BUG FIXES**
 - Resolved an issue that could cause the integration service to improperly shut down.

External IDs Tab on a Driver's Profile
