

Release Notes

Release Date: 11/11/2025

IDENTITY

- FEATURES
 - Added functionality to preserve link between Microsoft Entra and IDENTITY when Entra users' email addresses change.

RELAY

- FEATURES
 - Added logic to automatically dismiss a rejected document without notifying the driver.
 - Moved the icons from the horizontal bottom navigation to a vertical sidebar. See image, "Vertical Sidebar."
 - Removed the circled letters preceding the text labels for driver groups and departments.
 - Removed the column collapse functionality for Documents and Messaging.

ROLLER

- FEATURES
 - Updated CoPilot to version 10.28.2.391.

TORQUE

- FEATURES
 - Added a setting to control the creation of a single check call for a driver in TMWSuite, as opposed to two check calls, if a driver and power unit are on the same ping.
 - Added a support and debugging tool for Optimal Dynamics integrations.
 - Added more options for warning messages on trailers and geofence breaks.
 - Added the ability to update the booking code when processing load acceptances and driver assignments for the TMWSuite integration.
- BUG FIXES
 - Resolved an issue where a second drivers was not removed from a trip in Transflo when that driver was removed from a trip in TMWSuite.
 - Resolved an issue where the new broker contract carrier qualification was removed when a carrier alert was received.
