

# Release Notes

Release Date: 12/9/2025

## RELAY

- FEATURES
  - Added functionality to preserve line breaks in messages.
  - Deprecation of the web browser version of RELAY for mobile devices is scheduled for January 7, 2026. It is recommended that users download the RELAY Mobile app available in both the [Google Play](#) and [Apple App](#) stores. If a user chooses to access RELAY with a web browser on a mobile device, they will be directed to the appropriate app store to install the RELAY Mobile app.
- BUG FIXES
  - Resolved an issue where the urgent priority icon for group messages incorrectly wrapped.

## ROLLER Desktop

- FEATURES
  - Added support for detecting document scan quality by configuring a readability threshold. See image, “Document Scan Quality Detection.”

## TORQUE

- FEATURES
  - Added functionality to insert border crossing stops for the Optimal Dynamics integration.
  - Added logic to automatically create refrigeration breakdown insurance when included with motor cargo insurance for the TMWSuite integration.
  - Added logic to use the email address from the secure rate confirmation email, when present, as the carrier contact for the Highway integration.
  - Added settings to control how and when a trailer should carryover from a previous trip to a current trip for the Optimal Dynamics integration.
- BUG FIXES
  - Resolved an issue creating a deadhead on a multi-leg trip that had a deadhead stop incorrectly placed in the sequence for the TMWSuite integration.
