Release Notes

2026-01-02 Sprint

ADMIN

- BUG FIXES
  - Resolved an issue where filtering drivers by driver group did not work as expected.

IDENTITY

- BUG FIXES
  - Resolved an issue where the avatar upload modal for the user profile would intermittently remain open after the user's avatar was changed.

RELAY

- FEATURES
  - Added functionality to support PDF attachments with messages sent to drivers for third-party users using ROLLER, if the Motorcity Network agreement allows attachments.
  - Added functionality to support searching for drivers by mobile number. Please contact your Motorcity Systems representative to learn more about this feature.
  - Added logic to match the conditional logic and field ordering in ROLLER to the same documents and forms for document review.
  - Added the filenames of PDFs and images attached to scheduled messages.
- BUG FIXES
  - Resolved an issue where the group message map occasionally did not display the most up-to-date driver locations.

ROLLER

- BUG FIXES
  - Resolved an issue where scanning a document on some Android devices caused the document scanner to unexpectedly close.

ROLLER Desktop

- FEATURES
  - Added column filtering to the Announcements grid. See image, "Column Filtering for Announcements."

TORQUE

- FEATURES
  - Added insurance expiration dates and carrier qualifications to both the runtime log and expedite audit table for the TMWSuite integration.
  - Changed the setting for disabling date cascading to be on, by default, for TMWSuite customers.
  - Improved the logging of geofence breaks.
- BUG FIXES
  - Resolved an issue finding stops from geofence breaks and correctly updating stops at the same address.
