

Release Notes

2026-02-02 Sprint

IDENTITY

- BUG FIXES
 - Resolved an issue where users could not edit a business unit when the tenant did not have access to Motorcity Network.

RELAY

- FEATURES
 - Added more details for priority forms and form error resolutions. See image, “Priority Form and Form Error Resolution Details.”

ROLLER

- FEATURES
 - Added support for dark mode. See image, “Setting to Enable Dark Mode.”
 - Updated Instinct single sign-on (SSO) to support off-duty drivers.

ROLLER Desktop

- FEATURES
 - Added column filtering to the Signatures grid. See image, “Column Filtering for Signatures.”

TORQUE

- FEATURES
 - Added a setting to control if drivers are shown the route selection screen when opening CoPilot from a workflow stop.
 - Added functionality to look up truck miles from geolocation data if there are no cached miles in TMWSuite.
- BUG FIXES
 - Resolved an issue updating the stop times for multiple deadheads when the departure of a stop was not set for the Optimal Dynamics integration.
 - Resolved an issue where deadhead stops were not converting from UTC to local time for the Optimal Dynamics integration.
 - Resolved an issue where some check calls failed because the dates of previous check calls were missing.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.
