

# Release Notes

Release Date: 06/08/2021

## ADMIN

- Improved the search functionality for Drivers.
- Moved the search bar to the left. See image, “ADMIN Search Bar.”

## RELAY

- Added a setting in Application Settings to allow the sending of SMS messages while the driver’s status is Driving. See image, “Allow the Sending of SMS Messages While a Driver is Driving.”
- Added the Driver Card hover to the driver avatar at the top of the Message History window. See image, “Driver Card Hover.”
- Improved the user experience in the Header and Message History sections. See image, “Improved Header and Message History User Experience.”
  1. Moved the name, date, and error indicators above the message bubble.
  2. Moved the search bar to the left.
  3. Updated the appearance of the Send Message button.
  4. Updated the labels for the Messages and Forms toggles.
- Replaced the unread messages dot with a number that represents the number of drivers with unread messages in the Groups Panel. See image, “Unread Messages Indicator.”

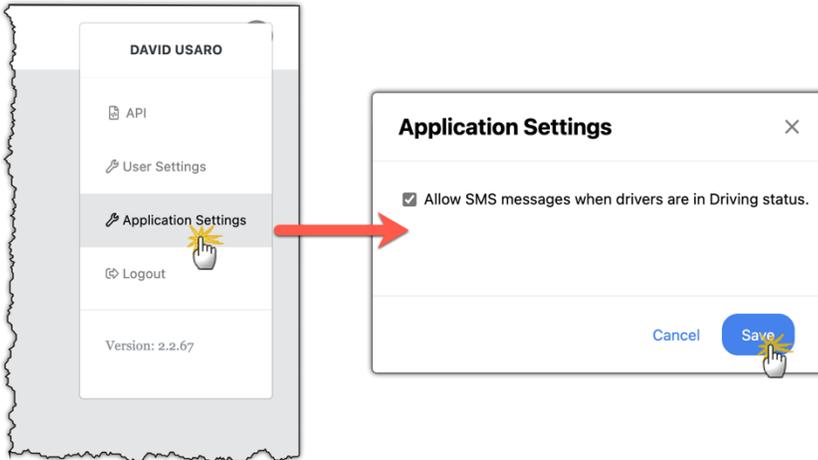

## TORQUE

- Captured the lifetime fuel level for Geotab users.
- Captured the local and UTC times.
