Release Notes

Release Date: 12/7/2021

ADMIN

- FEATURES
    - Added column sorting for Business Unit, Fleet, Division, Terminal, and Driver Groups in the Drivers and Power Units grids.
    - Enabled a map to show for the current location of a Power Unit even when hardware acceleration is disabled in the user's browser. See image, "Power Unit Map."
    - Enhanced sorting to allow for case-sensitivity.

IDENTITY

- FEATURES
    - Added restrictions for changing information for users managed with Active Directory.
- BUG FIXES
    - Removed the "Bad Request" toast notification when an email address has not been verified.

RELAY

- FEATURES
    - Added a filter for Unread Messages. See image, "Unread Messages."
    - Redesigned the Drivers column removing Read and Unread Messages categories.
- BUG FIXES
    - Fixed the workday calculation for a driver who is off-duty or in the sleeper berth.

TORQUE

- FEATURES
    - Added an update to the power unit in a driver's profile in the TMS when the driver signs on to the ELD.
