

Release Notes

Release Date: 12/21/2021

ADMIN

- FEATURES
 - Updated the arrow styling for dropdown menus for consistency.

IDENTITY

- FEATURES
 - Added a title to the General tab in My Tenant.
 - Added visibility for user profiles managed with Active Directory. See image, “Profiles Managed with Active Directory.”
- BUG FIXES
 - Resolved issue that limited user creation to Active Directory when Active Directory was not configured.

RELAY

- FEATURES
 - Created an API to retrieve messages to and from driver during a specific timeframe.
 - Updated the “Send Message” button appearance to read “Group Message.” See image, “Group Message Button Appearance Update.”
- BUG FIXES
 - Fixed an object error with the Driver search in group messages.
 - Resolved an issue with hours of service (HOS) calculations and formatting.
 - Resolved behavior with the unread Driver filter when an element was clicked.

TORQUE

- FEATURES
 - Added Samsara as a provider. See image, “Samsara Provider Settings.”
 - Created a runtime log for the Platform Science provider. See image, “Platform Science Runtime Log.”
