Release Notes

Release Date: 01/25/2022

ADMIN

- FEATURES
  - Improved page styling for overall design consistency.
- BUG FIXES
  - Fixed a bug removing a Driver Group from a driver.
  - Fixed a warning that was not appearing for unsaved changes when adding or removing classifications for a driver.
  - Resolved an issue where the "User Groups" label appeared when creating a Driver Group, even if no User Groups exist.
  - Resolved an issue with the Driver Group dropdown menu only showing 100 values even if more exist.

IDENTITY

- FEATURES
  - Defined a tabbing pattern for navigating fields on the sign-in screen.

RELAY

- FEATURES
  - Added automatic arrival and departure notifications for geofenced locations from TMW. See image, "Geofenced Location Arrival and Departure Notifications."
  - Added visibility for outbound loads being sent from the carrier's TMS. See image, "Visibility for Outbound Loads."
  - Updated the label for the toggle switch from "Forms" to "Workflow" above the Message History. See image, "Toggle Switch Update."
- BUG FIXES
  - Fixed an issue with birthday and anniversary messages not showing.
  - Resolved an issue with the unread message alert appearing when the provider sent historical messages.

TORQUE

- FEATURES
  - Added the HazMat classification to Eleos loads.
  - Added stop-specific details for building URLs for Eleos forms.
  - Created a runtime log for the Samsara integration. See image, "Samsara Runtime Log."
- BUG FIXES
  - Fixed a bug with updating a driver's duty status when the HOS times updated for the Platform Science integration.
