Release Notes

Release Date: 6/1/2022

ADMIN

- FEATURES
  - Added prevention for extra spaces being allowed before or after IDs, e.g. Driver ID, Power Unit ID, Group ID, etc.
  - Removed the Cancel button from screens where the functionality was redundant.
- BUG FIXES
  - Fixed a bug where the driver SMS authorization failed due too many requests being sent at the same time.

IDENTITY

- BUG FIXES
  - Resolved a series of issues affecting the Sidebar navigation and General, Business Unit, and Terminals tabs.

GAUGE

- FEATURES
  - Made some improvements to the Drivers Used report.

RELAY

- FEATURES
  - Moved the HOS clock settings from User Settings to Application Settings so they may be managed at the carrier level by an administrator. See image, "HOS Clocks Application Settings."
- BUG FIXES
  - Resolved issue where some emojis were being stripped from messages.
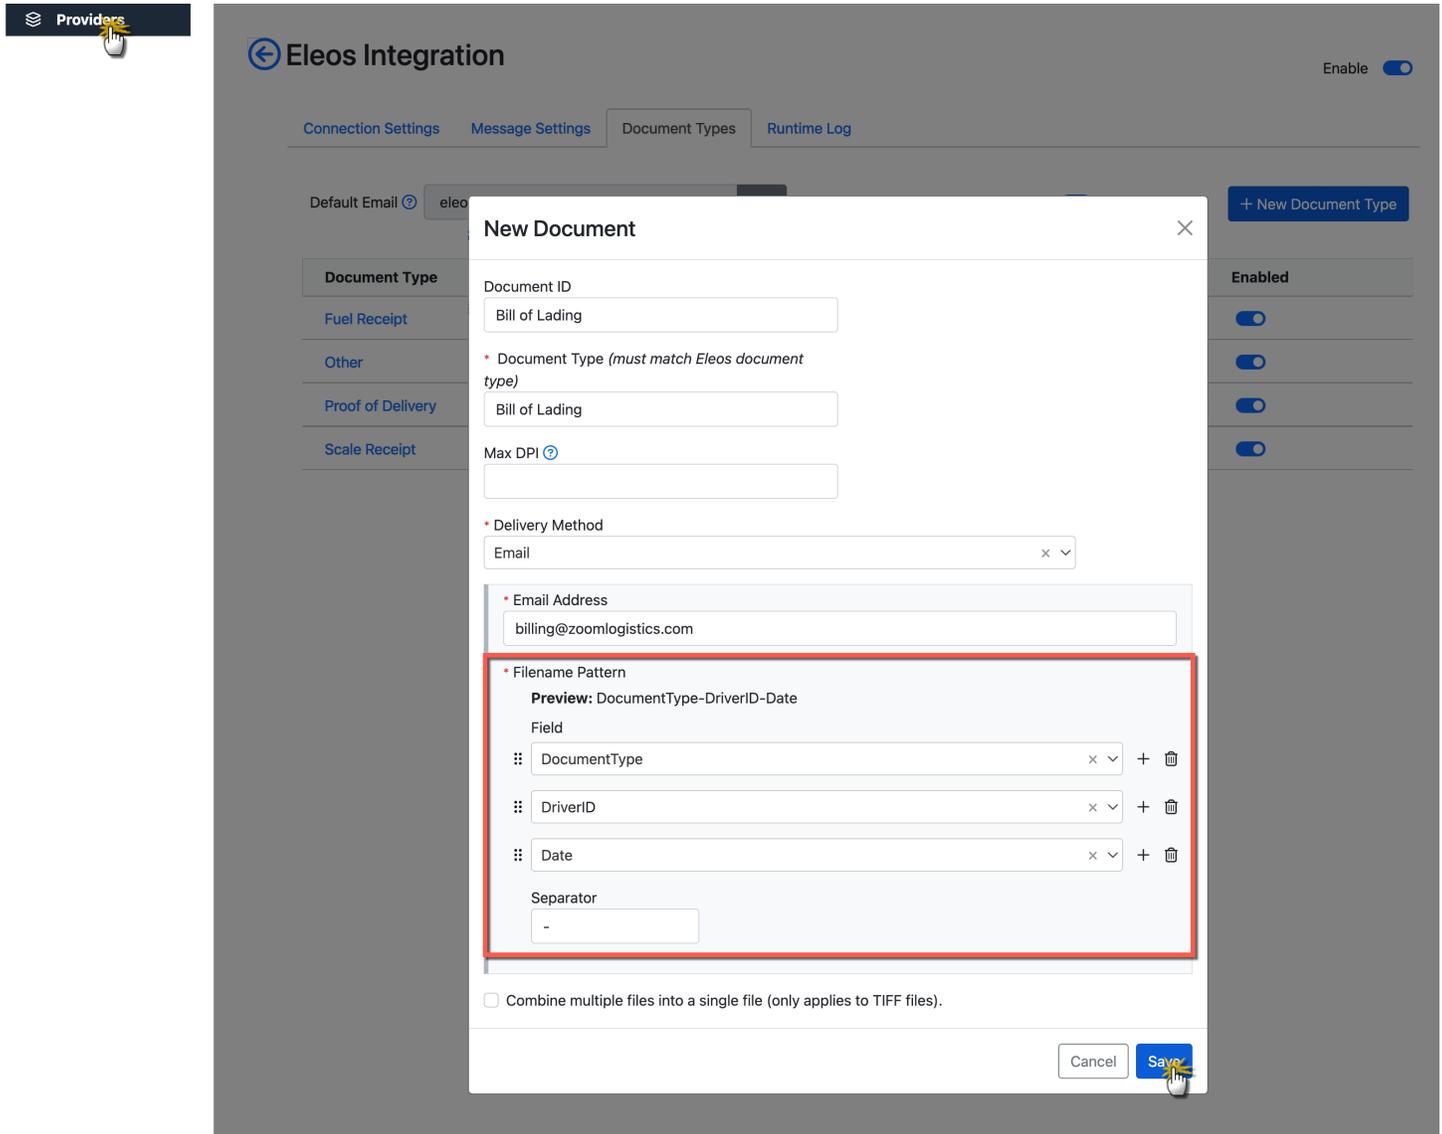

TORQUE

- FEATURES
  - Added support for passing additional geofence information with driver details.
  - Modified the Eleos document type filename creation to support additional values, data fields, and field separators. See image, "Eleos Document Type Filename Creation."
- BUG FIXES
  - Removed session-based processing for inbound messages for the Platform Science integration.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- o Resolved an issue with the Geotab editing page showing the integration description instead of the name in the header.
- o Updated the SkyBitz process to version 2.74.
