

# Release Notes

Release Date: 6/14/2022

## ADMIN

- BUG FIXES
  - Fixed a bug where driver avatar versions were removed during updates.

## RELAY

- FEATURES
  - Added SMS support for RELAY Mobile. See image, “RELAY Mobile SMS Support.”

## TORQUE

- FEATURES
  - Added the ability to send messages to drivers using ORBCOMM devices in power units.
  - Added storage of the ORBCOMM Driver ID for mapping HOS information.
- BUG FIXES
  - Added the load number to the Eleos document naming.
  - Resolved a bug where clicking the Back button in a browser while in a multi-tab provider integration resulted in problems with tabs.
  - Resolved an issue where the odometer reading was missing for power unit location pings for the Samsara provider.
  - Updated the headers for some providers that were displaying the provider’s description instead of the title.

## RELAY Mobile SMS Support
